## PROJECTS

DEVOTRA B.V. is an ISO 9001-2000 certified company, whose activities are mainly focused on engineering projects in developing countries. The company name DEVOTRA is an acronym for Development of Vocational Training, which clearly shows our deep involvement in vocational training projects. We offer turn-key services for different type of projects and are a specialized supplier of a wide range of professional technical equipment, which can be used different purposes.

### TURN-KEY SERVICES

- Consultancy
- Project planning
- Supply of equipment
- Installation
- Commissioning
- Training
- Aftersales

### PROJECTS IN THE FIELD OF:

- Vocational training
- Technical education
- Agricultural development
- Industrial development
- Peace keeping operations
- Relief aid

### PROJECTS FINANCED BY:

- Worldbank
- African Development Bank
- Asian Development Bank
- Islamic Development Bank
- United Nations
- European Community
- Carribean Development Bank

### SPECIALIZED SUPPLIER OF EQUIPMENT FOR:

- Metalworking
- Woodworking
- Welding
- Automotive
- Sheet metal
- Building
- Construction
- Refrigeration
- Plumbing
- Electrical
- Electronics
- Metrology
- Material testing
- Laboratories

## MOBILE WORKSHOPS

DEVOTRA has developed a number of Containerized Mobile Workshops on basis of standard 20-ft ISO containers. These mobile workshops are available as a single unit or as a set of four, which are connected together to create different workshops, including office and storage facilities. Our mobile workshops are fully self supporting and include; generator, air-conditioning, /heating, illumination, etc. Different types of workshops are available and the units can also be equipped as Mobile Laboratories for environmental research and health care.

## MOBILE TRAINING UNITS

The above developed Mobile Workshops can easily be converted to Mobile Training Units for educational purposes and can be customized for 100% to client's specifications. Some applications are: metalworking, welding, automotive, electrical, electronics, refrigeration, etc. By combining this product with the below Modular Units a flexible and relatively low cost training facility can be developed for training in remote areas.

## MODULAR SYSTEMS

Our Modular Systems are based on standard 10-20-30-40 ft ISO container sizes. Various models are available and they can be used as office, dormitory and sanitary units. The units can be stacked and connected to each other to create bigger office space. A special 20-ft Transpack knock down version is developed for easy and low cost transport.
